Education

- BSc in Computer Engineering – 2008 (Turkey)
- MSc in Software Engineering & Project Management - 2011 (Sweden)
- PhD in Management Engineering - 2022 (Turkey)

Career

- PTC - GSO Consultant in Nordics (Sweden) – 2011-2014
- PTC - Technical Area Manager – 2014 - ...

Hobbies & Achievements

- Cross-Continental Swimmer (Europe - Asia)

MODEL-BASED SYSTEM ENGINEERING

Dr. Mete Ömerali

Yönetici, Çözüm Danışmanlığı – Gelişen Pazarlar

20 Ekim 2023

Collaborative Model-based Systems Engineering

**A holistic, multi-disciplinary
and collaborative approach to designing
and maintaining complex systems**

AS-IS CHALLENGES: TIME, COST, AND QUALITY PRESSURES

Understanding & Coordinating Interdependencies

Unclear relationships between components, systems, and systems of systems

No Common Language

Lack of effective communication and stakeholder buy-in

Long Lead Times

No concurrent exploration of options and low rates of reuse impact on-time delivery

Quality & Regulatory Compliance

Risks discovered late and limited ability to validate designs

Cost Reduction Demands

Products are unnecessarily complex, and designs are redundant

HOW HAVE THINGS CHANGED?

Temperature Display Options...

Technology Evolution

Software;
GPS + Web Service

Electronic;
Voltage Thermometer

Mechanical;
Bimetallic Thermometer

Fluid Volume;
Mercury Thermometer

HOW DO YOU DECIDE?

Temperature Display Example...

External Sensor

Electronic

GPS & Web Service

Software

'Systems Engineering' Considerations

Cost?

Resilience?

Power Usage?

Quality?

Integration?

Engineering Complexity?

and more ...

MULTI-DOMAIN MODEL-BASED ENGINEERING

Capabilities

- Common systems level language (SysML)
- Whole team transparency
- Access to systems of record: OSLC, URL, ThingWorx...
- Stakeholders in-the-loop

Benefits

Shared workspace delivers parallel working productivity

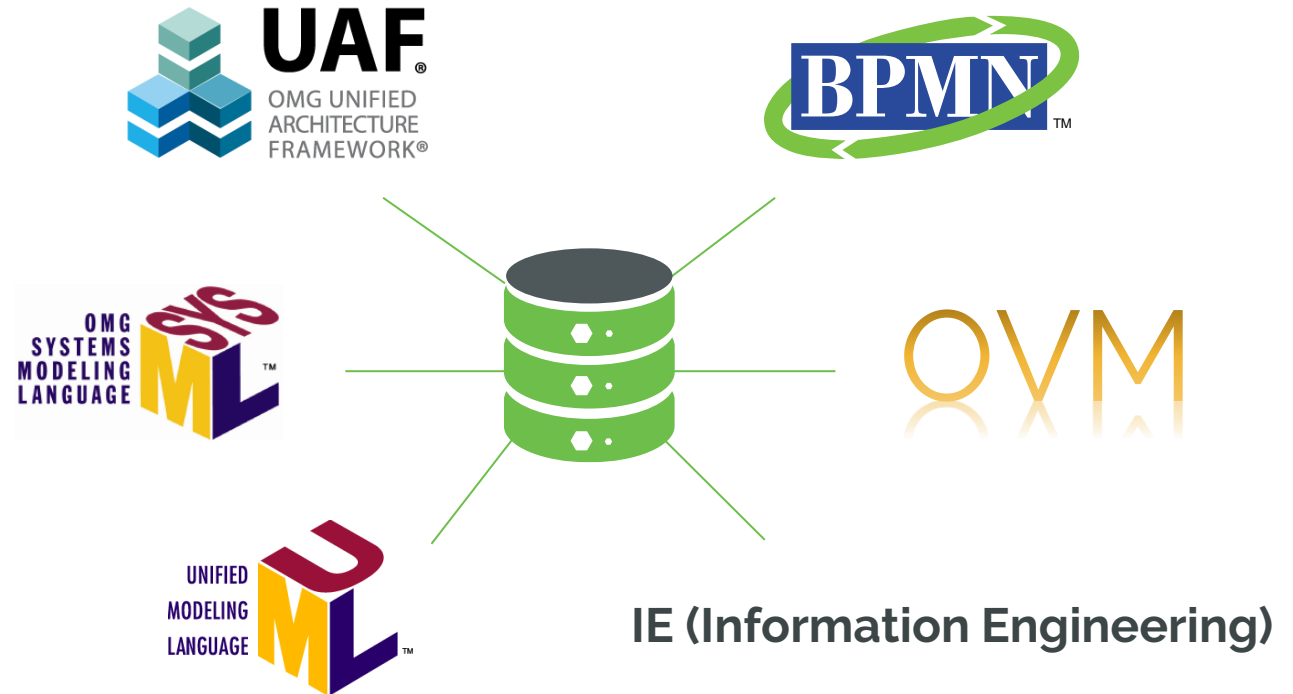

Cross-domain collaboration for complex product engineering

Scalable visual modeling for large teams and projects

STANDARDS-BASED MODELING

For Architecture, Systems & Software

- BPMN & UAF for Enterprise Architectures
- SysML for Systems
- UML for Software
- OVM for Variability
- IE for Data Models
- Visual Modeling with Data & Diagrams

Benefits

Minimized training and ramp up costs

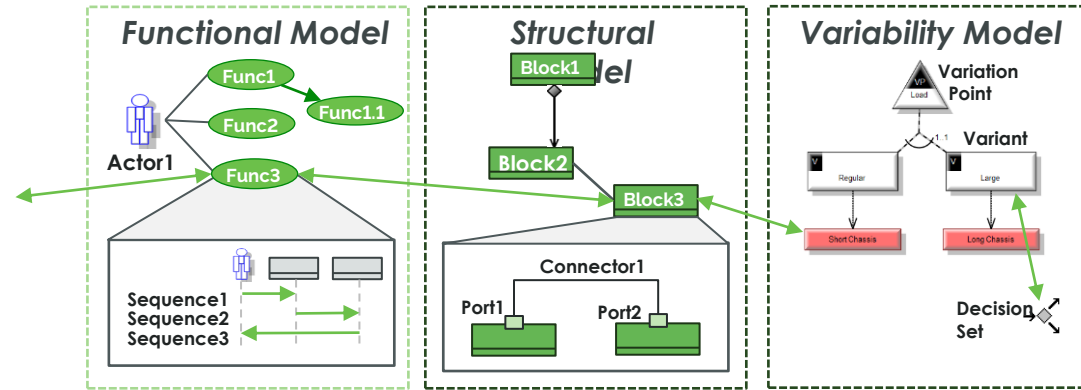

Reduce communication misunderstandings

Common language increases productivity

DESIGNED IN QUALITY

Digital Product Traceability

- Traceability for impact analysis
- Earlier Problem Identification
- Standard language compliance
- User defined reviews

Review	Priority	Found	Out of	Percentage
Abstract class not used as a data type	Must	6	6	100%
Abstract class without subclass	Must	6	6	100%
Model items without OSLC links	Must	1874	1874	100%
Unnamed associations	Must	64	64	100%
Operation not called	Must	10	12	83%
Missing data type	Must	42	53	79%
Compile time binding	Must	7	12	58%
Operation not defined	Must	7	12	58%
Not on Diagram	Should	113	218	52%
Use case without OSD	Should	4	11	36%

Not on Diagram

Dictionary items should appear on diagrams.

- Associates [InternalCombustionEngine - fre] Association is not shown on a diagram
- Associates [MeasuresOfEffectiveness - MaxAccelAn] Association is not shown on a diagram
- Associates [PowerSubsystem - can] Association is not shown on a diagram
- Associates [MeasuresOfEffectiveness - CapEq] Association is not shown on a diagram
- Associates [InternalCombustionEngine - fra] Association is not shown on a diagram

Benefits

Proves that you are building the right products and building them right

Change impact analysis reduces errors and costs

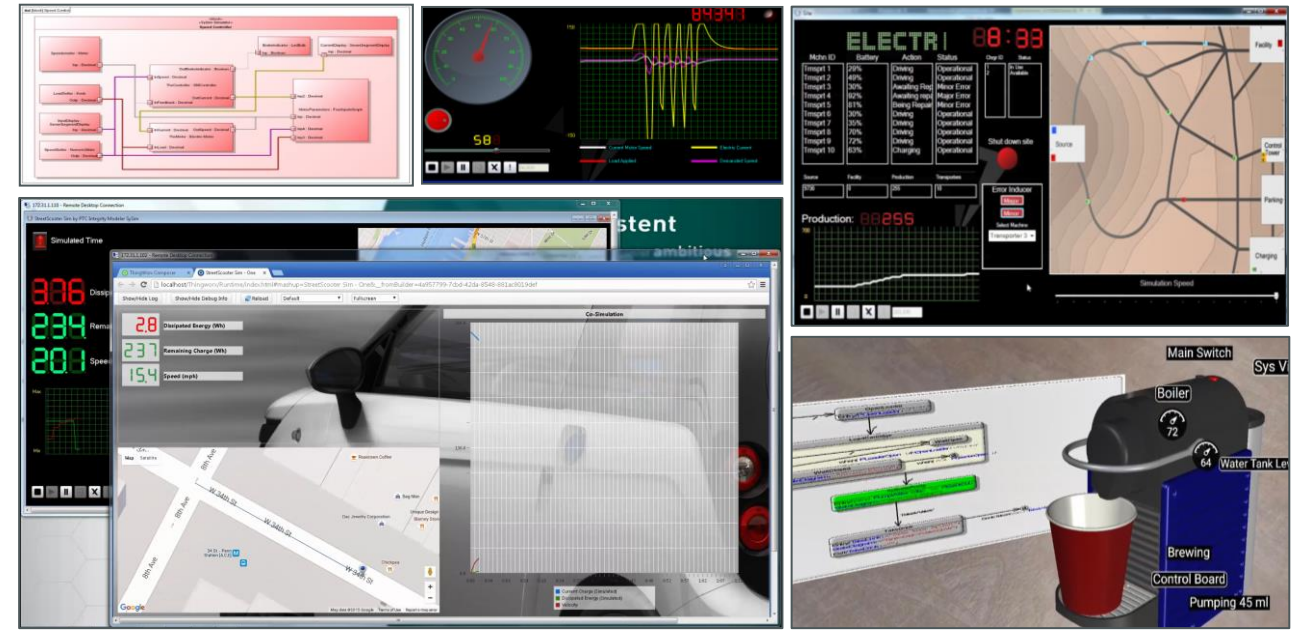

Enables industry regulation compliance

SYSTEM LEVEL VISUAL CO-SIMULATION

Performance Based Analysis

- Stakeholder in-the-loop
- Visually simulate systems model functionality
- Record simulation results for analysis
- Co-simulate with 3rd-party simulators
- Thing Worx Simulation

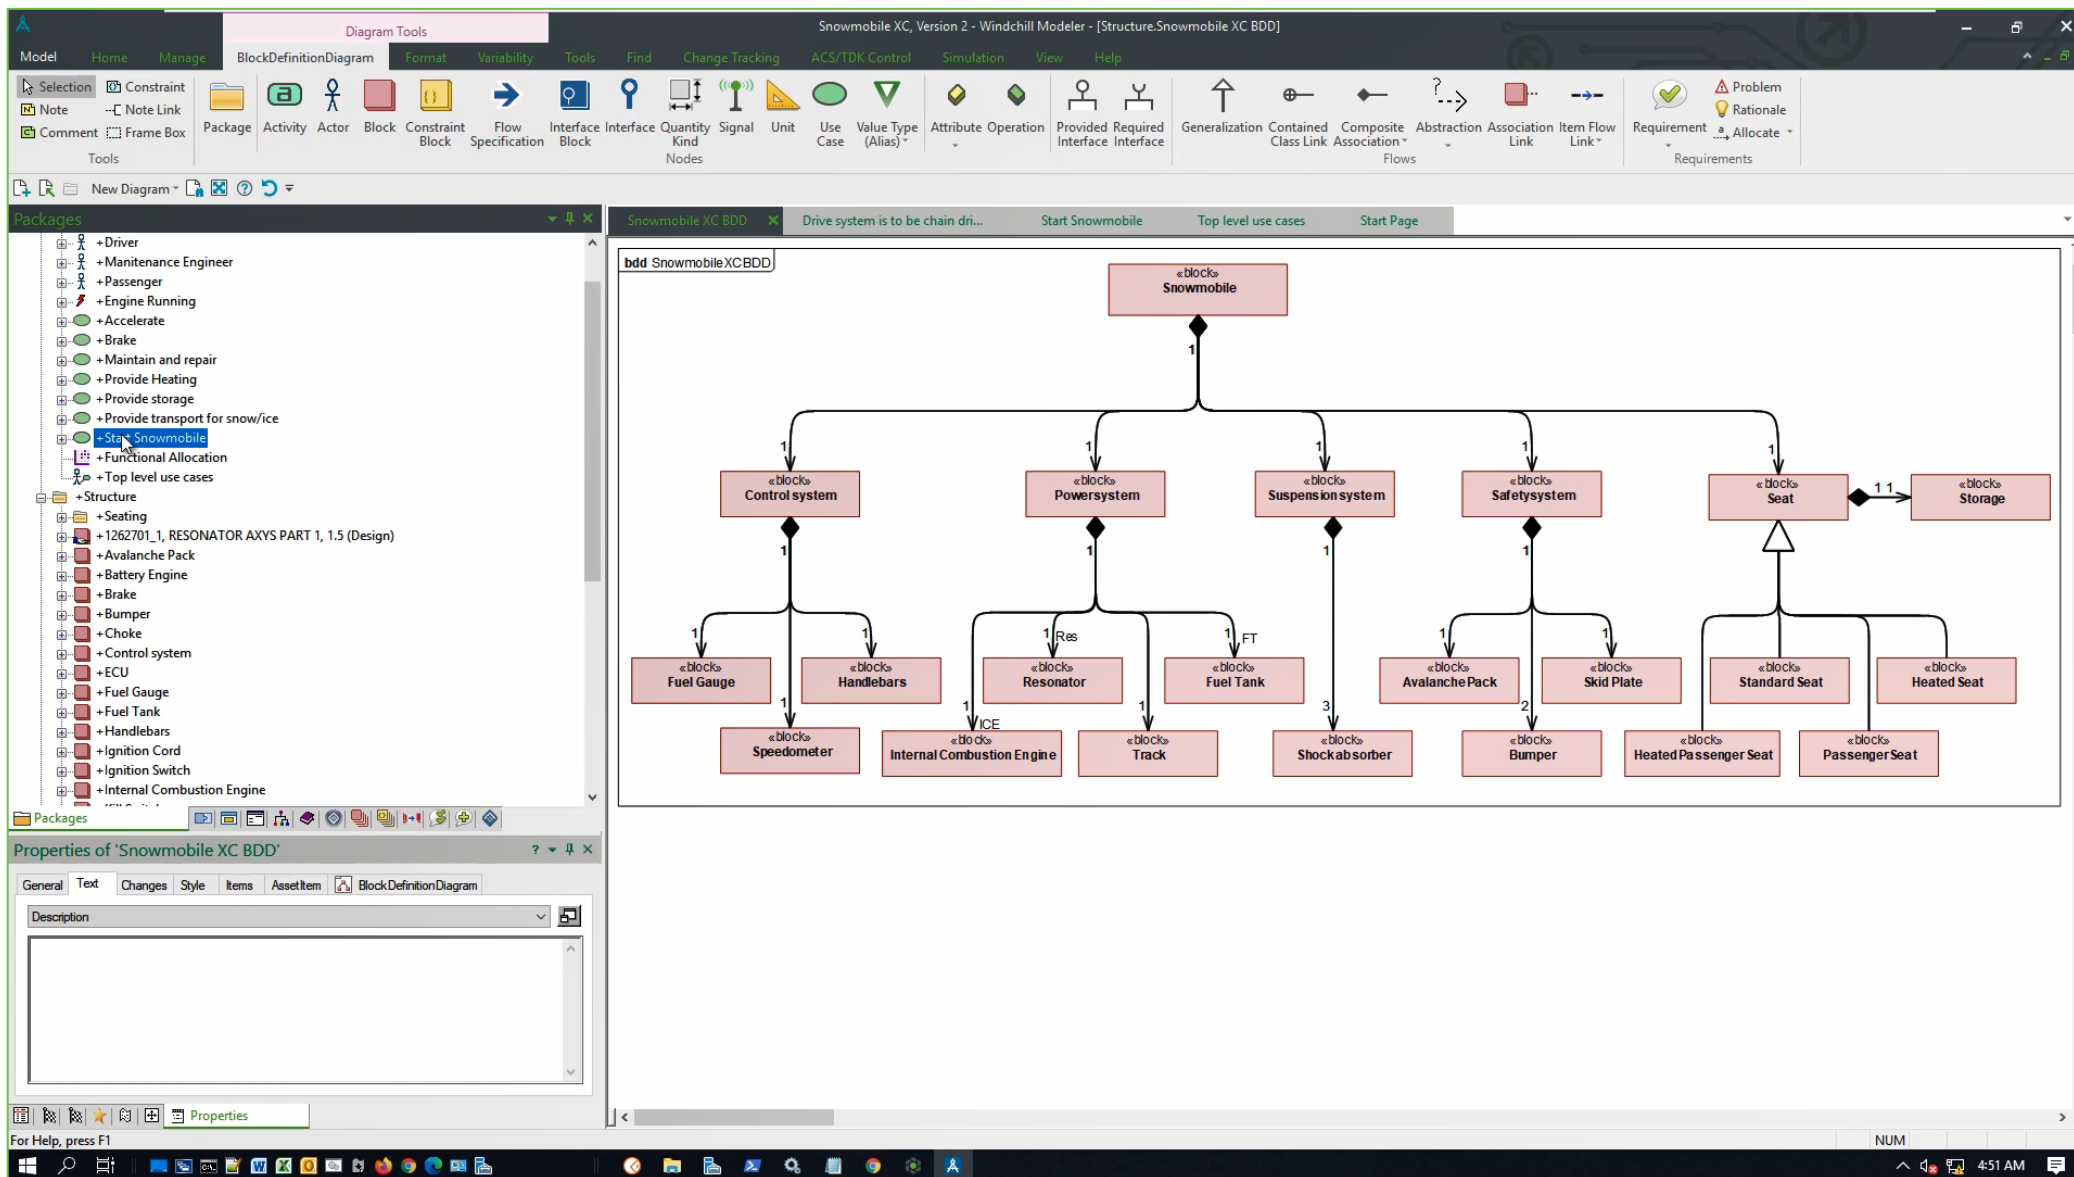

Benefits

Validate complex behavior early, reducing errors & costs

Minimize walkthrough effort and improve understanding

System level trade off study optimization

MBSE DEMO

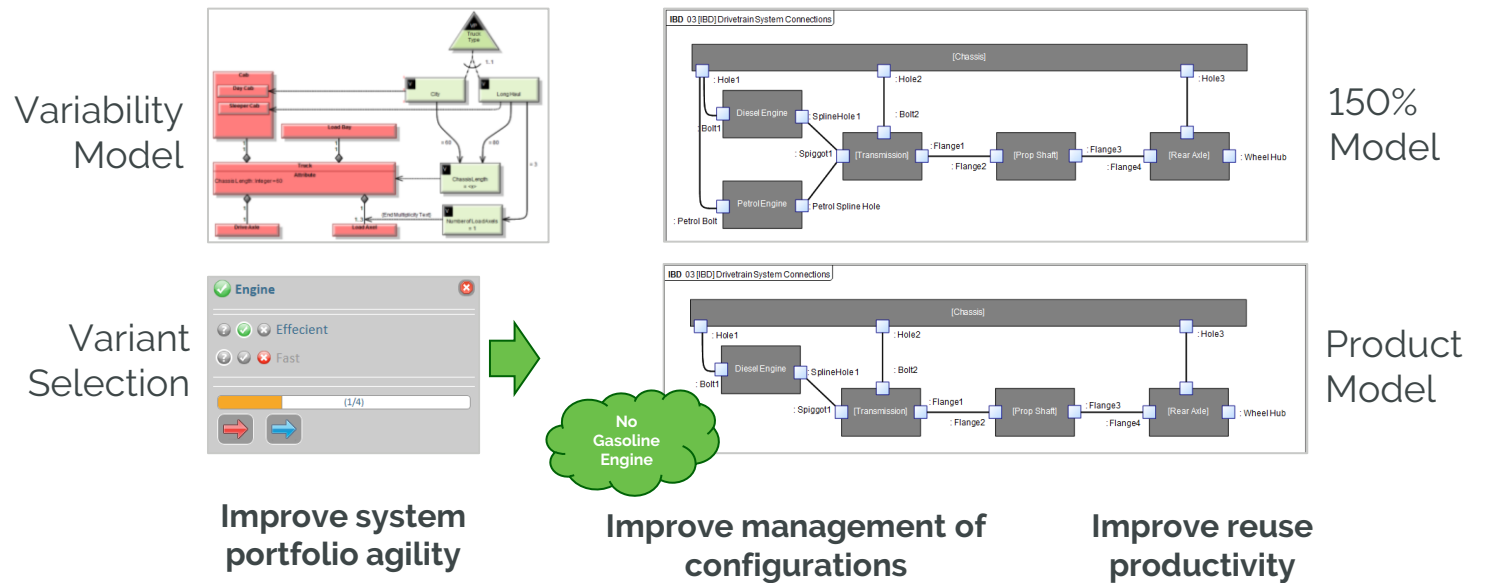

MODEL-BASED PRODUCT LINE ENGINEERING

MBPLE

- System product lines
- Drives module inclusion, parameters & numbers of parts
- Define product line configuration logic and rules

Meet customer & stakeholder precise product needs

Benefits

Increased productivity thru automated product model generation

Managed system product line complexity reduces errors and costs

MBSE and full variability in one tool reduces costs

PTC'S INTEGRATED ALM SUMMARY

- Requirements Engineering
- Risk Management
- Test Management
- Agile Engineering

- Model-Based Systems Engineering
- Software Modeling
- System Simulation & Co-simulation

CODEBEAMER AND MODELER INTEGRATION

The screenshot displays the Codebeamer ALM interface. At the top, the Codebeamer logo and 'codebeamer Application Lifecycle Management (ALM) Evaluation only! Not for production use!' are visible. A navigation bar includes 'My Start', 'Projects', 'Reports', 'Review Hub', 'Wiki', 'Documents', 'Trackers', 'SCM Repositories', 'Baselines', 'Admin', and 'Trash'. The current view is 'Customer Requirement Specifications > Document View' under the 'HSUV > Trackers' context. A search bar is present in the top right.

The main content area is divided into three sections for requirement specifications:

- Fuel efficiency:** Must deliver class leading fuel efficiency.
- Performance:** Must provide different operation modes for Sport, Economy, Urban.
- Safety:** (No description provided in the image).

Each section has a list icon, a document icon, a '0' counter, and a '+' sign. A right-hand pane shows details for the selected requirement: '[CRS-1507] Fuel efficiency'. The details include:

- Tracker: Customer Requirement Specifications
- Business Value: --
- Mitigates: --
- Status: **NEW**
- Type: --
- Complexity: --
- Release: --
- Assigned to: --
- Team: --
- Submitted by: bond Today 14:11
- Modified by: bond Today 14:11
- Story Points: --
- Color: --

Below the details, there is a section for 'EXTERNAL LINKED ITEMS' with two entries: 'WINDCHILL_SERVER_BASIC' and 'INTEGRITY_MODELER_SERVER_9.5.0.1_30D'. At the bottom of the interface, a footer states: 'This site is powered by codebeamer 22.10-SP2-SNAPSHOT2 (postgresql) | Incident | Question | Knowledge Base | Hotkeys | Licensed by ONLY FOR INTERNAL DEVELOPMENT'. The Windows taskbar is visible at the very bottom.

Windchill Modeler 9.6 delivers requirements traceability with Codebeamer
